KSI® Key Systems Inc.

Direct Control

Security Asset Managers™

Pair KSI Products With Your Existing Access Control System

A variety of KSI products including Security Asset Managers and SWATBoxes are available in "Direct Control" versions. These are units from which the embedded systems that power our standard devices are omitted. This option can appeal to those who seek direct control over every position and door of a device.

Direct Control is ready for access control, featuring clearly marked pass-through row boards with screw terminals for easy connection to an existing control system. The Direct Control SAM can include almost all options found in the standard SAM line, such as a variety of lock types, direct entrapment of important or master keys, compatibility with Tamper-Proof Key Rings®, and more.

Products Available in Direct Control

- Security Asset Manager™
- Lockers
- SWATBox®
- SurfaceSWAT™
- Surface Vault
- Asset Vault
