KSI
Key Systems Inc.

KSI® is an innovative leader of security and protection products in prisons and correctional facilities. The KSI OC Spray Station provides safe handling and control of OC spray and confirms canisters are to specified weight. The station provides controlled distribution, storage, removal from service, and detailed reporting for chemical spray canisters. Each station is network ready for remote programming of access and provides real time transactions to GFMS (Global Facilities Management System™ software).
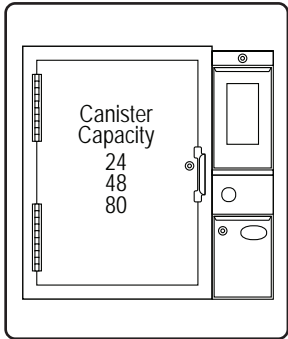

Protect your assets!

Confirm Canisters are Loaded for Use

Canister is weighed by our internal scale and then evaluated for service or for disposal.

Reports

OC canisters are individually identified. Our software allows monitoring of usage, the creation of time zones, email alerts, and other controls and reports.

Multiple Sizes

Cabinets are available to hold 24, 48, or 80 MK4 Canisters.

24 Can	24.25"w x 25" h x 8" d
48 Can	34.3" w x 25" h x 8" d
80 Can	34.3" w x 33.875" h x 8" d

Canister Capacity
24
48
80

User ID

User Identification options include PIN, Card Swipe, Proximity, and Biometrics.

Integrates with GFMS Software

Automatically import users and groups to GFMS software to reduce data entry and remain synched with your existing access control system.

Family of Products

Control exits, keys, tools, handcuffs, lockers, weapons, and drugs.

Each system includes a separate section for disposal of canisters.
