

## Remote Storage Lockers

The Remote Security Locker line provides a secure locking enclosure that can be mounted on the wall or other suitable structure. Controlled and monitored by an existing asset control system or Security Asset Manager. Available with or without a monitored internal asset. Standard or custom built, electronically controlled lockers can be modified any number of ways to accommodate the needs of your facility. Firearms, medical equipment, shop tools, expensive electronics, etc. – our locker solutions are in place around the world controlling local and distributed access to a range of high-value assets in all shapes and sizes.
