

Direct Control

Your Access Control Ready Solutions

*Pair KSI Keyboxes
With Your Existing
Access Control
System*

KSI® Security Asset Managers (SAMs) and SWATBoxes are available in “Direct Control” versions. These are units from which the embedded systems that power our standard devices are omitted. This option can appeal to those who seek direct control over every position and door of a device without intermediary computing hardware and/or software.

Direct Control SAM is ready for access control, featuring clearly marked pass-through row boards with screw terminals for easy connection to an existing control system. In addition, Direct Control SAM can include almost all options* found in the standard SAM line, such as a variety of lock types, direct entrapment of important or master keys, compatibility with Tamper-Proof Key Rings®, and more.

This Direct Control SWATBox is housed in our same high strength shell but operates solely on an external signal from your existing access control system. Provide your own 12 volt pulse to open the SWATBox™ on command.
