Keep your assets secure

Tamper-Proof Key Rings

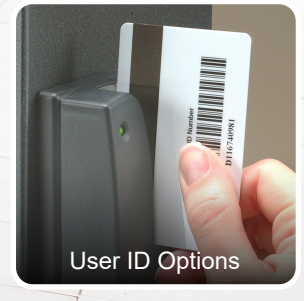

Interchangeable Cores

Lockers

Key Boxes

User ID Options

At KSI, we recognize the critical importance of key security in auto dealerships. With vehicles and parts being of high value, effective security measures are needed to safeguard assets, prevent unauthorized access, and deter criminal activity, thereby reducing financial losses. That's why we offer advanced security solutions to guarantee your assets are fully protected. Our state-of-the-art products provide you with complete control over your keys and other valuable assets, ensuring unparalleled security and peace of mind.

Our comprehensive systems offer robust security features, including access control and detailed reporting. For an extra layer of protection, consider KSI's Tamper Proof Key Rings. These patented high-security stainless steel rings are designed to be tamper-evident, ensuring they cannot be opened without detection. This additional safeguard keeps your most valuable assets secure.

KSI products are engineered to:

- Utilize KSI GFMS software for precise monitoring and comprehensive reporting.
- Reduce the risk of lost, misplaced, or stolen assets.
- Seamlessly integrate into your existing monitoring systems.

## Security Asset Managers

High-security, electronically-controlled key positions. Assets released to authorized users with active identification. Monitors and records asset removal to help prevent loss and theft. SAM key boxes are available in 8, 16, 32, 64, and 96 key positions. Custom solutions are available.

### Access Control

KSI products work with your existing access control system.

## Lockers

Smart storage standard or custom built, electronically controlled lockers can be modified any number of ways to accommodate the needs of your facility. Lockers secure a range of high-value assets in all shapes and sizes.

## SWATBox

Features an embedded install which conceals physical assets within your facility wall and away from public view. The customizable interior cavity may hold cards and keys or act simply as a locked drawer.

## Tamper-Proof Key Rings

High security solid and stranded stainless steel rings. They cannot be opened without detection, thus preventing asset removal or substitution. Five sizes available in each style

## Global Facilities Management System™

GFMS™ combines sophisticated and adaptable, web enabled, PC-based software with no client installations. Dynamic integration and custom application are cornerstones of our philosophy towards system management. KSI will help you formulate an asset management strategy specific to your facility's requirements, regardless of size, scope and pre-existing technology.
