Asset security management is crucial in the hotel industry to protect both employees and guests. Key Systems, Inc (KSI) offers an array of standard and customizable products that assist with hotel security protocol. Our Security Asset Managers (SAMS) house and monitor keys and key cards which can manage the overall hotel property.

Managing keys for large properties with numerous employees is a complex task. Using multiple key boxes strategically placed throughout the property can help streamline key management and enhance security. KSI key cabinets securely store and track keys. Only authorized personnel can access these keys, using methods like PIN codes, access cards, or biometrics. KSI's products, paired with our GFMS® software, allow for accurate tracking of who took which key and when. Tracking and reporting reduce the need for an evening shift manager to call on a daytime employee to intervene during their off hours.

Hotel management can access reports and conduct security assessments to identify vulnerabilities and ensure that security measures remain effective and up to date. The implementation of KSI products and security strategies create a safer environment for both their personnel and guests, thereby enhancing hotel reputation and guest satisfaction.

Key Systems, Inc. is an industry leader in key and asset security management. We are passionate about providing your most important assets with the highest level of safety and security with products made in the USA. Our engineering department is constantly adding new and exciting products to our existing lineup of network-ready, asset control and monitoring devices. We understand that your facility's security is of the utmost priority, thus we make it our priority to design products to fit your needs.

Shown without door

Security Asset Managers

High-security, electronically-controlled key positions. Assets released to authorized users with active identification. Monitors and records asset removal to help prevent loss and theft. SAM key boxes are available in 8, 16, 32, 64, and 96 key positions. Custom solutions are available.

Access Control

Products work with your existing access control system.

IC Cores

KSI Dimple Key

Lockers

Smart storage standard or custom built, electronically controlled lockers can be modified any number of ways to accommodate the needs of your facility. Lockers secure a range of high-value assets in all shapes and sizes.

Smart Track Key Cabniet

The cabinet allows authorized users access to keys using the KSI Smart Track App. Administrators can easily add users or view reports using the app.

Key Rings

Tamper-Proof Key Rings are high security solid and stranded stainless steel rings. They cannot be opened without detection, thus preventing asset removal or substitution. Five sizes available in each style

GLOBAL FACILITIES MANAGMENT SYSTEMS

GFMS™ combines sophisticated and adaptable, web enabled, PC-based software with no client installations. Dynamic integration and custom application are cornerstones of our philosophy towards system management. KSI will help you formulate an asset management strategy specific to your facility's requirements, regardless of size, scope and pre-existing technology.
