For nearly 30 years, KSI has provided innovative, engineering solutions to enhance prison security resources. From Security Asset Managers and our GFMS Handcuff Control Device, to the OC Spray Station and Weapons and Radio Lockers, our security products are designed to:

- Harness the power of integration into your current monitoring systems
- Adapt effectively to assign different levels of user access
- Reduce additional expenditures to outside vendors - e.g., locksmiths, asset replacements, etc.
- Reduce employee risk of lost, misplaced or stolen assets
- Increase safety to employees
- GFMS software to ensure concise monitoring and reporting

## Security Asset Managers

High-security, electronically-controlled key positions. Assets released to authorized users with active identification. Monitors and records asset removal to help prevent loss and theft. SAM key boxes are available in 8, 16, 32, 64, and 96 key positions. Custom solutions are available.

## Access Control

KSI products work with your existing access control system.

## Lockers

Smart storage standard or custom built, electronically controlled lockers can be modified any number of ways to accommodate the needs of your facility. Lockers secure a range of high-value assets in all shapes and sizes.

## SWATBox

Features an embedded install which conceals physical assets within your facility wall and away from public view. The customizable interior cavity may hold cards and keys or act simply as a locked drawer.

## Tamper-Proof Key Rings

High security solid and stranded stainless steel rings. They cannot be opened without detection, thus preventing asset removal or substitution. Five sizes available in each style

## Global Facilities Management System™

GFMS™ combines sophisticated and adaptable, web enabled, PC-based software with no client installations. Dynamic integration and custom application are cornerstones of our philosophy towards system management. KSI will help you formulate an asset management strategy specific to your facility's requirements, regardless of size, scope and pre-existing technology.
