Key Systems, Inc. proudly supports our military as they protect our country. Our products safeguard personnel and valuable military assets on bases throughout the world. Military assets are deployed worldwide, often in remote or hostile environments, making real-time tracking challenging. KSI products, including our Security Asset Managers (SAM) and Electronic Locker Systems offer monitoring, reporting and auditing capabilities for all stored keys and assets. Since military assets are deployed worldwide, often in hazardous conditions, it is vital for keep track of where assets are, their condition and who has access to them.

Our software, GFMS, pairs seamlessly with current monitoring systems, ensuring concise auditing and reporting capabilities. KSI's locker systems can be modified to accommodate a range of high-value assets, including radio units, weapons, and ammunition, in multiple shapes and sizes. Locker arrangements are designed to work alone or in conjunction with a SAM. All KSI products can be customized to specifications designed to the military's highest standards.

Security Asset Managers

High-security, electronically-controlled key positions. Assets released to authorized users with active identification. Monitors and records asset removal to help prevent loss and theft. SAM key boxes are available in 8, 16, 32, 64, and 96 key positions. Custom solutions are available.

IC Cores

KSI Dimple Key

Access Control

KSI products work with your existing access control system.

Lockers

Smart storage standard or custom built, electronically controlled lockers can be modified any number of ways to accommodate the needs of your facility. Lockers secure a range of high-value assets in all shapes and sizes.

SWATBox

Features an embedded install which conceals physical assets within your facility wall and away from public view. The customizable interior cavity may hold cards and keys or act simply as a locked drawer.

Tamper-Proof Key Rings

High security solid and stranded stainless steel rings. They cannot be opened without detection, thus preventing asset removal or substitution. Five sizes available in each style

Global Facilities Management System™

GFMS™ combines sophisticated and adaptable, web enabled, PC-based software with no client installations. Dynamic integration and custom application are cornerstones of our philosophy towards system management. KSI will help you formulate an asset management strategy specific to your facility's requirements, regardless of size, scope and pre-existing technology.
