KSI Key Systems Inc.

Interchangeable Cores

By implementing an effective key management program, retailers can significantly reduce the amount of time they dedicate to distributing, collecting, and monitoring keys. This includes keys for building access, store fixtures, storage areas, and vendor access.

With key control systems from KSI, retailers can experience a significant decrease in rekeying incidents while improving employee accountability. By integrating our Global Facilities Management Software (GFMS), managers can effectively record, track, and monitor key movements.

A KSI management system provides customers with a convenient way to handle various retail issues, such as security, inventory loss, employee access, and property management.

- Reduce risk of lost or stolen keys or assets
- Easily integrate into your current monitoring system
- Automatic alerts & report scheduling
- Custom administration roles
- Customizable reports

Security Asset Managers

High-security, electronically-controlled key positions. Assets released to authorized users with active identification. Monitors and records asset removal to help prevent loss and theft. SAM key boxes are available in 8, 16, 32, 64, and 96 key positions. Custom solutions are available.

IC Cores

KSI Dimple Key

Access Control

KSI products work with your existing access control system.

Lockers

Smart storage standard or custom built, electronically controlled lockers can be modified any number of ways to accommodate the needs of your facility. Lockers secure a range of high-value assets in all shapes and sizes.

SWATBox

Features an embedded install which conceals physical assets within your facility wall and away from public view. The customizable interior cavity may hold cards and keys or act simply as a locked drawer.

Tamper-Proof Key Rings

High security solid and stranded stainless steel rings. They cannot be opened without detection, thus preventing asset removal or substitution. Five sizes available in each style

Global Facilities Management System™

GFMS™ combines sophisticated and adaptable, web enabled, PC-based software with no client installations. Dynamic integration and custom application are cornerstones of our philosophy towards system management. KSI will help you formulate an asset management strategy specific to your facility's requirements, regardless of size, scope and pre-existing technology.
