Key Boxes

User ID Options

The cannabis industry is a prospering and competitive market with new opportunities and challenges emerging daily. Effective security measures are essential to prevent theft, unauthorized access, and diversion, ensuring the safety of both assets and personnel. Comprehensive security solutions enhance operational efficiency, safeguard sensitive data, and protect against potential external and internal threats. Key Systems, Inc. provides state-of-the-art security solutions designed to meet the unique needs of the cannabis industry. Our advanced locker systems ensure you maintain complete control over your inventory and operational assets.

- **Efficiently Manage User Access Levels:** Customize access permissions to suit different roles within your organization.
- **Cut Costs on External Services:** Minimize the need for locksmiths, asset replacements, and other external expenditures.
- **Mitigate Risks of Asset Loss:** Decrease the likelihood of assets being lost, misplaced, or stolen by employees.
- **Enhance Employee Safety:** Create a safer work environment for your staff.

Additionally, pair products with KSI's GFMS software. Our PC - based software adds extra security with precise monitoring and comprehensive reporting capabilities. By prioritizing security with Key Systems, Inc.'s solutions the cannabis businesses can maintain the integrity of their operations, build trust with consumers, and thrive in a competitive market.

Security Asset Managers

High-security, electronically-controlled key positions. Assets released to authorized users with active identification. Monitors and records asset removal to help prevent loss and theft. SAM key boxes are available in 8, 16, 32, 64, and 96 key positions. Custom solutions are available.

Access Control

KSI products work with your existing access control system.

Lockers

Smart storage standard or custom built, electronically controlled lockers can be modified any number of ways to accommodate the needs of your facility. Lockers secure a range of high-value assets in all shapes and sizes.

SWATBox

Features an embedded install which conceals physical assets within your facility wall and away from public view. The customizable interior cavity may hold cards and keys or act simply as a locked drawer.

Tamper-Proof Key Rings

High security solid and stranded stainless steel rings. They cannot be opened without detection, thus preventing asset removal or substitution. Five sizes available in each style

Global Facilities Management System™

GFMS™ combines sophisticated and adaptable, web enabled, PC-based software with no client installations. Dynamic integration and custom application are cornerstones of our philosophy towards system management. KSI will help you formulate an asset management strategy specific to your facility's requirements, regardless of size, scope and pre-existing technology.
