

DATA CENTERS

Keep your assets secure

Tamper-Proof Key Rings

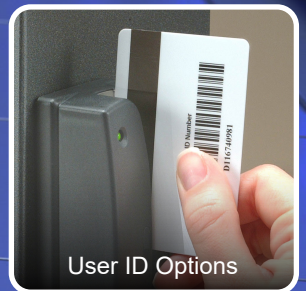

Interchangeable Cores

Lockers

Key Boxes

User ID Options

Key Systems, Inc. knows how important it is to keep assets and keys secure in data centers. In an environment where there is an abundance of sensitive information and equipment it is vital to have strong access control and easy tracking. KSI's innovative solutions provide reliability and peace of mind to keep these facilities secure. KSI's robust Security Asset Managers make it simple to manage keys, access cards, and important assets while keeping detailed records.

These key boxes can be personalized to best fit the needs of your data center. All access control options are monitored and provide reports using Global Facilities Management Software. For extra protection, KSI's Tamper Proof Key Rings provide a high-security option. Made of stainless steel, these rings are designed to show any signs of tampering, adding another layer of security for your most important items.

Security Asset Managers

High-security, electronically-controlled key positions. Assets released to authorized users with active identification. Monitors and records asset removal to help prevent loss and theft. SAM key boxes are available in 8, 16, 32, 64, and 96 key positions. Custom solutions are available.

Access Control

KSI products work with your existing access control system.

Lockers

Smart storage standard or custom built, electronically controlled lockers can be modified any number of ways to accommodate the needs of your facility. Lockers secure a range of high-value assets in all shapes and sizes.

SWATBox

Features an embedded install which conceals physical assets within your facility wall and away from public view. The customizable interior cavity may hold cards and keys or act simply as a locked drawer.

Tamper-Proof Key Rings

High security solid and stranded stainless steel rings. They cannot be opened without detection, thus preventing asset removal or substitution. Five sizes available in each style

Global Facilities Management System™

GFMS™ combines sophisticated and adaptable, web enabled, PC-based software with no client installations. Dynamic integration and custom application are cornerstones of our philosophy towards system management. KSI will help you formulate an asset management strategy specific to your facility's requirements, regardless of size, scope and pre-existing technology.
