

Card SAM

Vehicle fuel cards.

Slot attendant and technician cards.

Contractor and visitor access badges.

Key and card access go hand in hand across the multiple industries that Key Systems, Inc. products serve. Our Card SAM provides controlled access, storage and reporting for the cards critical to your facilities operation.

Secure Any Card

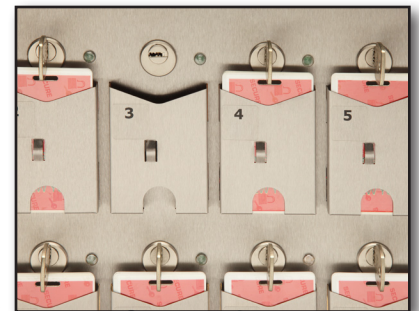

- Company credit cards
- Employee/Contractor/Visitor Badges
- Door/Room access cards
- Vehicle fuel cards

* Secure multiple related cards in one position

Like the other SAM models, the new Card-Key SAM also:

- Produces audit trails that record and document every transaction at the SAM.
- Opens only for authorized users.
- Offers multiple access levels.
- Alarms if asset is out beyond a certain time limit.

Exterior Card Positions

Retaining cards in exterior vertical card sleeves provides electronic monitoring and physical security. A dual switch on each position ensures that card and key must be locked in place in order to register the card as returned. Each locked key position physically prevents the corresponding card from being removed.

Internal Card Positions

Cards stored internally are encased in a protective plastic sleeve and latched via Tamper-Proof Key Ring. Position key and card are physically linked together and must both be removed/returned in order to complete each transaction.
